EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Detailed Description:

- a. Pg. 3, line 21, delete "It", insert "It is".
- b. Pg. 8, line 20, delete "In", insert "It".

IN THE CLAIMS:

- a. Claim 12, line 18, delete "**H**," , insert "**H**, **W_{opt}** is the optimum channel-shortening pre-filter,"
- b. Claim 12, line 19, delete "and", insert "are correlation matrices and"

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The following is a statement of reasons for the indication of allowable subject matter: The instant application discloses a receiver. Prior art references show similar methods but fail to teach: **"said plurality of FIR filters is expressed by matrix W"**, as in claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Examiner notes that prior art reference (Al-Dhahir et al. US Patent 6,870,882) has been considered. However a double patenting rejection is not supported. The instant application recites wherein "the decision logic is responsive directly to the pre-filter output points". However US Patent 6,870,882 discloses wherein "decision logic is responsive to outputs developed by a subtractor". Therefore US Patent 6,870,882 does not constitute double patenting.
